PROJECTS

AirAssist AI — Multilingual Support Assistant **Oct 2026**

Individual capstone project · UNICEF Youth Digital Skills Programme (HBC-YDP-2026), Horizon Bridge Consulting

- Built an AI support assistant for a fictional airline that answers general travel questions in Dari, Pashto, and English and says when it has no verified answer.
- Implemented the website and chat widget in HTML, CSS, and JavaScript, with a dependency-free Node.js server that validates input, rate-limits requests, and forwards chats to an n8n AI-agent workflow using OpenRouter and a Google Sheets knowledge base.
- Key features: language switching, conversation memory, and a consent-based support form that emails requests. Deployed on Vercel and n8n Cloud; tested in Dari and English on desktop and phone.

Tech: JavaScript, Node.js, HTML/CSS, n8n, OpenRouter, Google Sheets

Live demo: airassist-ai-website.vercel.app

EXPERIENCE

Head of Students' Union **Sep 2025 – Present**

Dara-e-Suf Students' Union, Balkh

- Lead the union and organized the "Study Methods" reading competition for young people in two districts of Samangan (Feb 2026): a one-hour exam, marking observed by independent representatives, and a public prize ceremony.

Teacher (Mathematics) **May 2025 – Aug 2025**

Azar Higher Education Center — Mazar-i-Sharif, Afghanistan

- Taught mathematics, prepared lesson materials, and supported students' understanding of course content.

EDUCATION

Balkh University

Software Engineering, Faculty of Computer Science

2024 – 2028 · 3rd year

Markazi Dara Souf Bala Boys High School, Samangan · 2012 – 2023
